

YouGame API

YouGame can work with third-party applications through the API. Each request has to contain `api_key` which is visible in tracker's settings. Email is used to determine receiver of points / achievement and must match the one used in YouTrack. Response is given in json format.

Adding Points

Related Url parameter is optional. The rest of parameters are mandatory.

Request url: <http://yougameapp.com/api/points> POST

Example params:

```
{
  api_key: 'tracker_api_key',
  points: {
    email: 'ted@example.com',
    for: 'Performing code review',
    related_url: 'http://github.com',
    exp_points: 55,
    mineral_points: 0
  }
}
```

Example response:

```
{errors: ['Email can't be blank']} or {success: true}
```

Granting Achievements

Achievement symbol must match to any custom achievement that is used on related tracker.

Request url: <http://yougameapp.com/api/points> POST

Example params:

```
{
  api_key: 'tracker_api_key',
  points: {
    email: 'ted@example.com',
    achievement_symbol: 'great_reviewer'
  }
}
```

Example response:

```
{errors: ['Achievement symbol does not match any achievement']} or
{success: true}
```
